

An Art Experience For The Senses

Touch

A gallery experience with follow up workshops will convey the impact of touch on learning, understanding, and teaching.

This month long unique gallery exhibit invites and encourages "viewing" through the sense of touch. Join any of the related events and workshops that tap into the sensual nature of perception. Awaken your senses.

Teachers of children with unique learning styles will gain insight into methods and materials, to motivate and enrich student learning.

Why Touch?

To explore and promote:

- How a multi sensory experience supports understanding and appreciation of a work of art
- Enlightenment that could inform a person's approach to seeing
- Enlightenment that could inform a person's approach to teaching
- Increased awareness of others' abilities to see in a different way
